About NBC

NBC Bearings, owned by National Engineering Industries (CKA Birla Group), was founded in 1946 in Jaipur as India's first bearing manufacturer. With 80 years of expertise, it is now a leading global exporter known for precision, durability, and engineering excellence, serving over 30 countries. NBC is the only bearing manufacturer to receive the Deming Grand Prize for Total Quality Management.

In 2020, it acquired Kinex Bearings to expand its global presence. NBC's advanced, digitized plants support critical industries including automotive, railway, aerospace, and industrial sectors worldwide.

NBC Milestones

1946

National Bearing Company was established

1958

Renamed as National Engineering Industries Limited; the NBC trademark retained

1981

Bearing production started in Newai, Rajasthan

1982

Technical Collaboration with BRENCO, USA for Cartridge Tapered Roller Bearings

2005

Bearing production started in Manesar, Haryana (Now Shifted to Bagru)

2003

Received TS 16949 Certification

2000

ISO-14001 and QS-9001 Certification

1995

ISO 9001 Certification

1985

Technical Collaboration with NTN Japan

2006

Received AAR Certification

2010

Deming Application Award

2014

Bearing production started in Savli, Gujarat

2015

Became the world's only bearing manufacturing company to get the Deming Grand Prize

2017-18

- Industry 4.0 journey started
- Received the 'Great Place to Work' certificate

2023

Bearing production started in Bagru, Rajasthan

2022

- NBC Mascot Runninggo launched
- NBC Kaili JV, China started
- NBC Global Technology Centre, Germany started

2021

- India's Best Workplaces in Manufacturing (Top 30)
- NEI Amsted JV Started in Bagru, Rajasthan
- 75 years of incorporation
- NBC Global Sales Office started in Switzerland

2020

- Acquired Kinex Bearings, Europe
- Launched Needle Roller Bearings
- The Jaipur plant received the IGBC Platinum certification

2024

- Ventured into Aerospace segment
- Established office in USA
- Agreement with BROADSENS for Sensors

2026

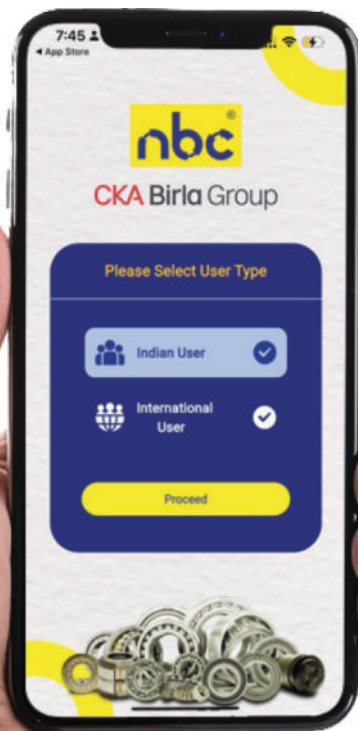

- BIS Certification
- Drone Business started
- New Auto Parts Business started
- Great Place To Work '9th Year in a Row'

NBC Connect App - Check the Genuineness of Bearings

Counterfeit bearings can lead to machine breakdowns, production losses, safety risks, and increased maintenance costs. With the NBC Connect App, you can quickly check the authenticity of your NBC Bearings products and ensure complete peace of mind.

Why Bearing Verification is important

Protect Your Machinery

Ensure your equipment runs smoothly with genuine NBC Bearings engineered for performance and durability.

Avoid Counterfeit Products

Fake bearings may look similar, but they can severely impact machine life, productivity, and operational safety.

Ensure Reliable Performance

Original NBC Bearings deliver trusted quality, precision engineering, and long-lasting performance across industries.

Check Before Fit

Don't take chances! Verify with the NBC Connect Mobile App

Simply scan the code on the packaging and confirm the authenticity.

Trusted Across Various Industrial Applications

Construction

Built for heavy loads, shock and harsh conditions, delivering durability and reliable performance across demanding construction equipment.

Oil and Gas

Engineered for critical oil and gas applications requiring high reliability, durability and dependable performance under demanding operating conditions.

Cement

Designed to withstand heavy loads, dust, vibration and continuous operation across demanding cement manufacturing applications.

Metal

Built for extreme loads, high temperatures and shock, ensuring reliable performance across demanding metal processing and production equipment.

Chemical

Reliable solutions for chemical processing equipment, designed for continuous operation and dependable performance in challenging industrial environments.

Textile

Engineered for high-speed textile machinery, enabling smooth, low-noise operation, consistent performance and enhanced equipment reliability.

Electric Motor

Low Noise, Low Vibration (EMQ) bearings for electric motors, delivering low noise, smooth operation, high-speed performance and long service life.

Conveyor

Dependable bearing solutions for conveyor systems, enabling smooth material movement and reliable performance under continuous and varying load conditions.

Pump

Engineered for industrial pumps, delivering smooth operation, high-speed capability and dependable performance across a wide range of applications.

Ceramic

Built to perform in dusty, high-temperature environments, ensuring reliable operation across critical ceramic manufacturing equipment.

Power

Reliable bearing solutions for critical power generation equipment, designed for continuous operation, demanding loads and high equipment availability.

Pulp and Paper

Designed for high-speed, continuous-duty pulp and paper machinery, delivering reliability and durability under demanding operating conditions.

Tough Job? Get a Tough Bearing

Enabling world-class predictive maintenance for any industry, anywhere worldwide.

New upgraded NBC Self-Aligning Roller Bearings can provide up to twice the service life as the original under tough operating conditions. Combining clean and homogenous high-quality steel with an improved heat treatment, new upgraded NBC bearings have a superior balance between hardness and toughness. This advancement gives upgraded NBC Self-Aligning Roller Bearings a higher degree of wear resistance, enabling up to twice the service life of the original, in applications where there are high levels of contamination or poor lubrication conditions. All standard NBC Spherical Roller bearings, CARB Toroidal Bearings and most Spherical Roller Thrust Bearings have now been upgraded to the NBC performance class.

Condition Monitoring Services

Every machine requires thorough maintenance and foresightedness for the highest efficiency. To predict potential failures to improve asset reliability, Condition Monitoring is a trusted perspective technique at NBC.

Major bearing application areas

Vibration Analysis & Fault Diagnosis

Vibration Signature analysis is the process by which intelligent information is extracted about the condition of a machine through the vibration data gathered during machine operation. NBC Bearings perform fault diagnosis based upon vibration signature and predict various machinery faults. Our expertise in vibration analysis and fault diagnosis provides intelligent solutions for protecting machinery from catastrophic failures.

Laser Alignment

Alignment practices are often required to protect equipment from premature failures. Misaligned conditions of assets often lead to more power consumption, severe vibration levels, and premature bearing failures.

Thermography

Infrared thermography is a technique that produces a visible graph or a thermographic image of thermal energy radiated by objects.

Thermography is often required to detect hot and cold spots, Condition Monitoring of insulation lining of the boiler, steam pipeline and hot air ducts. Detection of thermal abnormalities is also performed using thermography.

Machine condition data is collected, either with an on-line system or with hand-held devices by skilled personnel your own, a service partner or by NBC. Certified NBC analysts interpret and report on the data from Remote Diagnostic Centres using the most advanced, cloud-based technology and proprietary NBC signal analysis techniques. These subscription-based services provide access to machine data and to expert NBC diagnostics from anywhere, any time.

Key Benefits:

Cost savings

Avoid capital investments for hardware and software.

Global access

View reports or actual vibration data plots any time day or night from any location.

Data Integrity

Automatic data uploading minimizes human error and establishes consistency and standardization throughout your organization.

Expert Analysis

NBC knowledge enables us to apply 80 years of accumulated experience to diagnose collected data and make recommendations for actions.
